

WILDWOOD® ONEDERFUL™ TOFU

TASTING NOTES

ONE TOFU, ENDLESS POSSIBILITIES:

Making its debut this year, **Wildwood Onerderful Organic Tofu** is prepared to exact specifications by Pulmuone's tofu master, using a proprietary, patented technology to create a tofu versatile in texture and neutral in taste with fewer calories and more protein than other firm tofu brands. Onerderful also is the first water packed tofu to not require pressing before use, making it a more convenient and time saving option for recipes. Onerderful has multiple uses from smoothies and stir frys to sauces and desserts and better absorption without a beany or nutty taste. Onerderful tofu won't crumble or lose its shape in a pan.

TASTING NOTES:

Onerderful Tofu is non-GMO verified and made with organic North American sprouted soybeans and natural coagulants. It delivers a neutral and refreshing taste, blending perfectly with any meal without changing the desired flavors.

NUTRITIONAL INFORMATION:

All Pulmuone and Wildwood products adhere to strict genuinely Natural Principles, which require all ingredients to be free of artificial preservatives, colors, sweeteners and ingredients containing common toxins. **Wildwood Onerderful Organic Tofu** has a better nutritional profile than other firm tofus with 28% more protein, 62% less total fat and 28% less calories. It is also vegan and gluten free.

PACKAGING / PRICING:

Available in single 14 oz. package or 15.5 oz. double pack.

AVAILABILITY:

Wildwood Onerderful Tofu is available at all Northern California Whole Foods Markets and is rolling out nationally later this year.
